Low Intensity Elevated Lights "LIEL"
 120 and 240 Volts
 FAA Compliant L-860

Low Intensity Elevated Lights

Low intensity constant voltage elevated runway and taxiway edge lights ("LIEL") mark the outlines of heli-pads, runways and taxiways and runway threshold and end. The fixture consists of a clear or colored Fresnel lens (globe) mounted on an aviation yellow powder coated cast aluminum lamp housing. The powdercoat finish complies with the US Military Standard Salt Fog Test conducted per MIL-STD-810E, Method 509.3, Procedure 1 for corrosion resistance. The lamp is secured by an O-ring seal and clamp band. The upper assembly mounts on a 1" EMT extension into the 1.5" NF aluminum breakable coupling. An optional 2" NPS breakable coupling is available. All of the hardware is stainless steel.

The LIEL may be mounted on a base plate or stake, sold separately. The light is furnished with wire leads for wiring in the field. Most of the replacement parts are compatible with other manufacturers; consult Flight Light with specific inquiries. With a low initial cost and up to 8,000 hours rated lamp life (69W), the LIEL is the most economical light we offer.

Flight Light LIEL
 (Shown on base plate, sold separately.)

Base Mounted
 12" Base Plate
 (sold separately)

Shallow Base Mounted
 5" Shallow Base and
 8.5" Base Plate
 (sold separately)

Stake Mounted
 30" Angle-Iron
 Mounting Stake
 (sold separately)
