Compliance

FAA AC: 150/5345-39D
ETL Certified L-853
ICAO Annex 14, Vol. 1

Retroreflective airport markers are used to delineate airport taxiways, runway edges, ends and thresholds. Our ETL Certified airport markers consist of a co-extruded polyethylene tube with Type V retroreflective sheeting and a high strength plastic fastener. The markers can be installed in soil, on asphalt or on concrete.

Features

- ETL Certified FAA L-853 standard, AC 150/5345-39D.
- 360° visibility with abrasive resistant ASTM Type V wraparound reflective sheeting.
- Corrosion resistant, no above ground metal parts.
- Lightweight, all plastic construction and components.
- Constructed of UV resistant durable linear low density, co-extruded polyethylene which makes the post resistant to extended sun exposure.
- Integrated locking tabs allow for quick post installation and replacement.
- Surface mount or soil anchor versions available.
- Debris inhibiting plastic cap.

Specifications

- Reflective Colors: Blue, Silver, Red, Green.
- Tube Colors: White, Light Gray, Dark Gray.

- 14" (36 cm) high tube.
- 12" (30.5 cm) high reflective sheeting.
- 8" (20 cm) base diameter.
- 18" (46 cm) standard soil anchor length.
- 96 sq. inches of ASTM D4956 Type V high-intensity reflective sheeting.

Available colors:
Reflective: Blue, Silver, Red, Green.
Tube: White, Light Gray, Dark Gray.

Ordering Code

Type	Mounting Base*	Tube Height	Tube Color	Reflective Color
76-853	SMA: Surface Mount Assembly, Twist Lock GP3: Soil Mount, Closed End Anchor, 18"	14: 14"	DG: Dark grey	B: Blue
		18: 18"***	LG: Light grey	G: Green
		24: 24"***	W: White	R: Red
		30: 30"***		S: Silver
76-853				

* Sub-surface and other mounts available upon request.
** FAA approval limited to blue or silver reflective color.
