# Medium Intensity Airport Rotating Beacon

## USE

Honeywell offers a Medium Intensity Rotating Beacon used to identify airports, heliports and seaplane bases. The medium intensity rotating beacon is commonly used at general aviation airports and can be equipped with a photocell for automatic on / off switching.

## FEATURES

- Equipped with leveling legs and leveling device for easy installation.
- Installs on 12 by 6 inch platform.
- Long life quartz lamps (4000 hours).
- Minimal parts to maintain.
- Photocell option for day/night on-off control (ideal for unattended airports).
- Heater option allows for use to -55° C.
- Four light beacon with lamp changer and indicator light that visually notifies maintenance personnel of a lamp outage, but will continue to operate.
- Beacon poles and L-802 high intensity beacons are available (contact factory).
- Available with two, three, or four lights.
