Runway Edge Light
H-Series
Type: L-850C
Honeywell

Runway Edge Light

Type: L-850C

Compliant with:

FAA Advisory Circular AC150/5345-46B, Class 2, Style 3.

Conforms to:

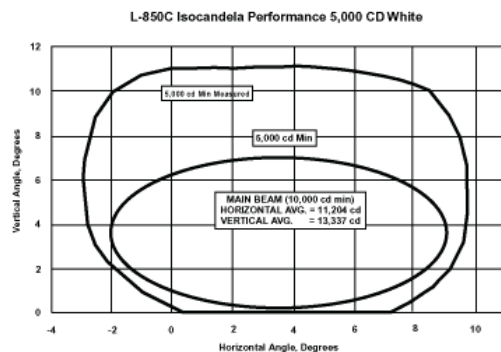

Transport Canada TP312E, Figure B-10 and ICAO Annex 14, Figure 2.9.

USE

The Honeywell Runway Edge Lights are used to define the runway edge, as elevated edge lights would be used, except they are to be used when a light is required at the intersection of the runway with another runway or taxiway. Prisms are non-field replaceable.

FEATURES

- Fixture rises a maximum of 0.200 inch above the surface finish.
- Light fixture is a bi-directional fixture with four (4) 48-watt halogen lamps operating simultaneously.
- Can be ordered for independent lamp operation with two leads.
- Can be used for any FAA Category I, Category II, Category III, ICAO, or Military runway edge applications.
- Light housing is made from a one-piece aluminum casting making it lightweight (14 lb).
- Mounts on a standard size L-868B base whose top surface is 0.750 inch below the surface finish.
