Taxiway Omni-Directional Light
Type: L-852E and T
Honeywell

Taxiway Omni-Directional Light

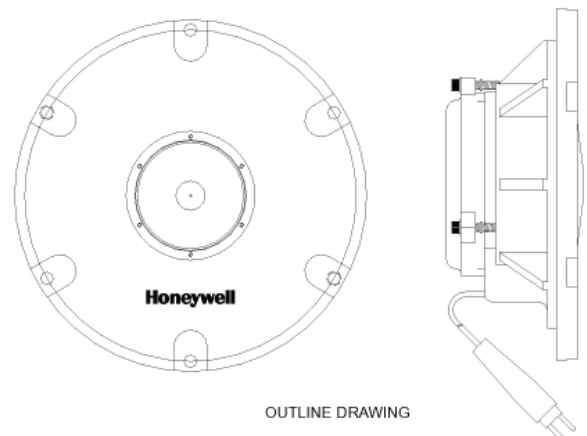

Type: L-852E and T

USE

The Honeywell Omni-Directional Lights are used to identify taxiway intersections and/or taxiway edges where elevated lights may be susceptible to damage from jet blasts. The taxiway omni-directional light is also commonly used to light up the apron edge between the apron and the usable taxiway.

FEATURES

- Fixture rises a maximum of 0.210 inch above the surface finish.
- Light fixture is an omni-directional fixture with one (1) 48-watt halogen lamp.
- Light housing is made from a one-piece aluminum casting making it lightweight (14 lb).
- Mounts on a standard size L-867B or L868B base whose top surface is 0.750 inch below the surface finish.
